PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience engineering scalable web and mobile applications across the MERN stack, Next.js, and React Native. Specialized in architecting performant REST APIs, real-time communication systems with Socket.IO, and AI-driven features. Proven track record of boosting web performance (Lighthouse 90+), modernizing legacy codebases, and building production-ready architectures from database schemas to responsive interfaces.

SKILLS

- **Languages** — JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend** — React.js, Next.js, Redux, Tailwind CSS, Framer Motion, GSAP
- **Backend & Database** — Node.js, Express.js, MongoDB, Firebase, Puppeteer
- **AI & Integration** — AI Chatbot Development, Prompt Engineering
- **APIs & Real-time** — REST APIs, Socket.IO, API Integration, ImageKit
- **Tools & Platforms** — Git, GitHub, VS Code, Vercel, Netlify

EXPERIENCE

FullStack Developer, Atum Information Technologies

03/2024 – Present | Pune

Honors: Awarded Employee of the Year for driving core web performance gains and architectural redesigns

- Accelerated Core Web Vitals and raised Google Lighthouse scores from 68 to 90+ across enterprise web properties by implementing automated code splitting, dynamic imports, and responsive asset delivery via ImageKit.
- Engineered the complete frontend architecture redesign using React and Tailwind CSS, standardizing responsive mobile-first workflows and cutting client bounce rate.
- Designed and deployed production RESTful API endpoints in Node.js and Express to manage high-throughput dynamic data flows and centralize application state.
- Directed structured weekly code reviews and technical pair-programming sessions, mentoring 20 junior developers in React patterns, state management, and Git collaboration workflows.

Junior Software Developer, Bioclutch Scientific Pvt. Ltd

03/2023 – 02/2024 | Aurangabad

- Shipped 3 commercial platform modules ahead of scheduled release milestones using React, Node.js, and MongoDB.
- Decreased overall frontend page load latency by 35% by refactoring legacy data-fetching cycles and implementing structured client-side caching.
- Optimized MongoDB query patterns, indexing, and JSON serialization protocols across data-heavy scientific reporting endpoints, improving API response throughput by 35%.

- Built secure token-based authentication and role-based access controls using JSON Web Tokens (JWT) and Firebase Auth.

PROJECTS

Vibernote — AI-Powered Real-Time Communication Platform,

Stack: React Native, Node.js, Socket.IO, MongoDB, OpenAI API

- Architected a bidirectional messaging engine using Socket.IO [↗](#) and Node.js for low-latency text delivery and real-time user presence tracking.
- Integrated OpenAI endpoints to implement automated contextual responses, conversation summarization, and sentiment analysis.
- Implemented native speech-to-text processing pipelines allowing automated audio transcription alongside emotion tracking metrics.
- Designed scalable backend architecture with authentication and real-time messaging.

WheelSearch — Automated License Plate Recognition (ALPR) App,

Stack: React Native, Google ML Kit, Vision Camera

- Developed an on-device OCR pipeline utilizing React Native Vision Camera and Google ML Kit for real-time license plate detection and text extraction.
- Implemented device geolocation tracking modules to map and catalog scanned vehicle metadata with localized historical search indexing

Clothing & Fashion E-Commerce Website [↗](#),

Stack: React, Redux, Node.js, Express, REST APIs, ImageKit

- Built an end-to-end shopping workflow featuring dynamic product filtering, Redux centralized state persistence, and responsive cart checkout flows for a 50+ item catalog.
- Integrated ImageKit CDN auto-compression pipelines, reducing media payload footprints by 40% and cutting average page load times by 50%.

Healthcare & Wellness Tracking Application [↗](#), Stack: Next.js, Tailwind CSS, Firebase, Firestore

- Engineered a HIPAA-conscious patient health dashboard utilizing Next.js Server-Side Rendering (SSR) and Firestore real-time listeners, achieving a sub-2s First Contentful Paint.
- Structured custom responsive charting modules and interactive wellness metrics tracking backed by secure Firebase authentication.

Restaurant Web Application (React, TypeScript, Tailwind) [↗](#)

- Delivered a visually rich restaurant website using React, TypeScript, Tailwind CSS, and Framer Motion.
- Created interactive UI components for menu display, gallery, and brand storytelling.
- Improved user engagement through smooth animations and responsive design principles

CERTIFICATIONS

Employee Of The Year Award – ATUM

React Native Mobile App Development By GFG [↗](#)

Data Structures & Algorithms in JavaScript by GFG

Education

Bachelor of Arts (B.A.), Yashwantrao Chavan Maharashtra Open University (YCMOU)

08/2022 – 06/2025
